XVI. Management's Discussion and Analysis or Plan of Operation.

A. Plan of Operation

Prior to July 26, 2012, including our fiscal years ending December 31, 2010 and 2011, we were a dormant inactive Nevada corporation whose charter was revoked by the State of Nevada for failing to comply with corporate formalities, make informational filings and pay required fees. We were reinstated on July 26, 2012. The reinstatement was a result of a July 9, 2012 Clark County, Nevada District Court Order in Case No.A-12-662821-B, that appointed Ricochet, a shareholder of Issuer and applicant in the proceeding, lawful custodian of the company pursuant to Nevada Revised Statutes (NRS) 78.347 ("Court Order"). The Court Order requires, among other things, Ricochet to provide reasonable notice to all record shareholders of a shareholder meeting to be held within a reasonable time after July 9, 2012; to report to the court every three months during its custodianship; and to file an amendment to our Articles of Incorporation containing the following disclosures and statements:

1. Disclosures of any previous criminal, administrative, civil or NASD or SEC investigations, violations, or convictions concerning Ricochet or its affiliates or subsidiaries;
2. A statement that reasonable, but ultimately unsuccessful, attempts were made to contact the officers or directors of the corporation to request that the Company comply with corporate formalities and to continue its business;
3. A statement that Ricochet is in fact continuing the business and attempting to further the interests of the shareholders;
4. A statement indicating that Ricochet will reinstate or maintain the corporate charter;
5. Any other information required by Nevada regulation.

Our ability to continue as a going concern is dependent upon our ability to generate profitable operations in the future and/or to obtain the necessary financing to meet our obligations and repay our liabilities arising from normal business operations when they come due. Management intends to address the going concern issue by funding future operations through the sale of equity capital and by director loans, if needed.

We are in the development stage and anticipate that we may continue to generate losses from operations in the near future. We believe our current available cash, along with anticipated revenues, may be insufficient to meet our cash needs for the near future.

There can be no assurance that financing will be available in amounts or terms acceptable to the Company, if at all.

These conditions may raise substantial doubt about our ability to continue as a going concern. Our ability to continue our operations is dependent on Management's plans, which may include the raising of capital through debt and/or equity markets with some additional funding from other traditional financing sources, including term notes, until such time that funds provided by operations are sufficient to fund working capital requirements. We may need to incur additional liabilities with certain related parties to sustain our existence.

Management's Discussion and Analysis of Financial Condition and Results of Operations.

There are no known trends or events that have or are likely to have a material impact on our short term or long-term liquidity. However, we have limited operating capital. We have meager cash reserves and limited access to credit, which may not provide us with the necessary funds to address our liquidity requirements.

We have no significant elements of income or loss that do not arise from our continuing operations nor do we have any current material commitments for capital expenditures; the significant fluctuations in the price of consumer goods will have a material impact on our business; consequently, from time to time, our financial statements may be materially different.

Our successful implementation of our business plan is dependent on a number of factors that should be considered by prospective shareholders, not the least of which is our ability to acquire investment capital.

We are in the early stages of development and could fail before implementing our business plan and we may incur net losses for the foreseeable future. We are a relatively new business venture. We have operating losses from the initial implementation of our business and operations, and we face unforeseen costs, expenses, problems and difficulties that could easily prevent us from becoming profitable.

We could be exposed to liabilities or other claims for which we would have no insurance protection. We do not currently maintain any comprehensive business insurance policy. If uninsured losses occur a purchaser of our common stock may lose their entire investment.

C. Off-Balance Sheet Arrangements.

We have no off-balance sheet arrangements.
